SITE MANAGEMENT Data Centre Features

Dispensers no longer mysterious devices as users can easily see status

Reviewing the flow rate on all hoses on the site

Seeing the last 20 deliveries on any dispenser

Checking that the price change has occurred

FUEL HEAD OFFICE - Business Benefits

- Your data in transition and in storage is safe
- No special equipment, apps or office space, just an internet connection
- Authorised users can use their office PC, tablet or smart phone
- Site/Dispenser KPI's can be quantified
- Uptime and status is visible for all sites and dispensers
- No dispenser control issues are hidden or missed
- Detailed issue emails sent 24 hours a day
- Lock Hose(s) rather than cone off the full dispenser
- Issues/change logs are date/time stamped
- Less discovery on site for a targeted service task
- Site wide status allows complete service planning
- Data is only available to people you authorise
- Can split asset operations and evaluate by group
- Site daily operational level, business values
- Dispenser price change records
- Site status view of pump events

SITE MANAGEMENT Business Benefits

- Either place a nozzle, product grade out of service or cone off the entire dispenser
- Average flow rate visible to check customers are having a good experience
- Removes reliability on staff memory for whether delivery taken and payment made
- Easy check on customer delivery for time and values
- Simple confirmation view that all prices are changed and correct
